Deliverable 3.4.3
Showcase

Coordinator: Elena Simperl
With contributions from: -
Quality Assessor: Maria Maleshkova

Editor:	Elena Simperl, STI-R
Deliverable nature:	OTHER
Dissemination level: (Confidentiality)	PU
Contractual delivery date:	30.04.2014
Actual delivery date:	30.04.2014
Version:	2.0
Total number of pages:	4
Keywords:	Project showcase, Linked Data showcase

Executive summary

This deliverables introduces the main components of the project showcase. The showcase is available online and all components can be accessed from the project Web site at http://www.euclid-project.eu. In addition to the Web site the showcase includes the curriculum for the usage of linked data, all learning materials, the community monitoring platform, and the online presence of the project (SlideShare, vimeo, iTunes U, Twitter, LinkedIn).

EUCLID
EdUcational Curriculum for the usage of Linked Data

Document information

IST Project Number	FP7 - 296229		**Acronym**	EUCLID
Full title	Educational curriculum for the usage of Linked Data

Showcase overview

The EUCLID showcase brings together a selection of the most important outcomes of the project – thereby importance is understood in relation to the Description of Work, but also considering the impact of the artifact in the real-world. As such, the showcase consists of components that are at the core of our work plan, but are also representative for the project in the Linked Data practitioners' community.

All parts of the showcase are freely available online to view and download. It is recommended to start with the project Web site, which can be used as a starting point to explore the content of the showcase and its main components.

The **project Web** site is hence the first component of the showcase. It is a key part of our online appearance and an important dissemination instrument. It is described in terms of functionality and impact in the deliverables in WP2. The Web site is available at http://euclid-project.eu/.

A second component of the showcase is the learning materials produced during the project, together with the curriculum these materials adhere to.

- The **curriculum** can be found at http://euclid-project.eu/resources/curriculum

- We offer a collection of **rich, multi-modal learning resources**, including slide decks, video recordings, screencasts, exercises, and how-to's, as well as a more comprehensive textbook and a course organized along learning paths. All training materials can be downloaded at http://euclid-project.eu/resources/learning-materials. To increase the visibility of the project we use external platforms to host some of these materials. For instance, for slides we have purchased a professional SlideShare account. The EUCLID textbook has been published on iTunesU and is available at http://bit.ly/using-linked-data-effectively. For all these different types of resources, the project Web site serves as a gateway to reach the relevant platforms and view, download, and explore the resources.

A final component of the showcase is dedicated to dissemination and community engagement.

- EUCLID has developed a **monitoring platform** as a means to remain aware and involved with the topics the practitioners are mostly interested in. Deliverable D2.1.5 presents the functionality of the platform. An online demo is available at http://euclid.fluidops.net/.

- To promote its training program the project has used a mixture of hosting platforms and social media channels, which together contribute to the online reputation of the project. These are:
    - **EUCLID on SlideShare**: to publish slides and video content and gather feedback: http://www.slideshare.net/EUCLIDproject
    - **EUCLID on Vimeo**: to publish video content, in particular webinar recordings and screencasts, and gather feedback: http://vimeo.com/user15631788
    - **EUCLID on Twitter**: to build a community of followers interested in eLearning and data-centric training: http://www.twitter.com/euclid_project
    - **EUCLID on LinkedIn**: to promote EUCLID events and learning materials to a wider community of professionals: http://www.linkedin.com/groups/Education-Training-on-Semantic-Technologies-4917016

All EUCLID learning materials are available under a CC-BY license.
